Every country has implemented the European Packaging Directive in a different way, inter alia putting different obligations to obliged industry. Therefore, the costs for compliance with obligations contain different factors affecting the cost levels which should be taken into account when comparing the relative costs of compliance across various European schemes.

Key factors influencing relative compliance costs include the following:

- Existing collection and recovery infrastructure in the waste management sector.

- Packaging sources being used to meet national recycling quotas (household only or all packaging):household packaging waste is more expensive to collect and recover than packaging waste arising at industry's back door.

- Proportionate share of costs being borne by industry. This can be the full costs for collection, sorting andrecovery of used packaging up to the so called additional costs for the separate collection and sorting.

- Respective recycling quotas and the effect of derogations.

- Collection systems used affect charges: bring systems are generally less expensive than door-to-door collection, but they usually collect less packaging.

- Geographic location and population density: remote and sparsely populated regions will generally be more difficult and expensive to collect from.

- Enforcement regimes influence costs; the more companies who participate in the scheme, the greater the spread of the cost base.

- Labour costs and general overheads differ depending on the prevailing local economic conditions.

Just recently, the new Waste Framework Directive introduced a number of changes, among which the concept of 'EPR schemes'. Under their scope, eco-modulation has become an obligation to boost packaging recyclability under the general, minimum requirements outlined for these schemes. The new Waste Directive calls for the fees to be modulated, where possible, for individual products or groups of similar products. EXPRA is currently conducting a research on the various approaches that could be feasible and comparable, with a specific focus on the "product category".

A first assessment of this exercise shows that some compliance schemes have already moved onto introducing additional fee modulation. The latter generally follows an approach based on the “shared balance sheet according to the economic cost of packaging recyclability”.

This document gives an overview of the current costs for compliance with the respective national recovery systems for packaging and packaging waste. All data have been sent to EXPRA by the respective systems (as of March 2020), and have been compiled to the best of our knowledge. Nevertheless, this information is subject to change at any time, especially in the light of the COVID 19 crises and we therefore cannot guarantee its accuracy and applicability to each type of packaging. We therefore kindly ask you to get in touch with the respective system of your country of operation to obtain the latest information relevant to you.

Should you have any further question, please feel free to contact me via phone or e mail.

Best regards,

Joachim Quoden

Managing Director of EXPRA

1. Belgium: Fost Plus

2023 Compliance tariffs per material in EUR / kg:

Materials	2022 (EUR/kg)	2023 (EUR/kg)
Glass	0,0494	0,0581
Paper-Cardboard	0,1007	0,0781
Steel	0,1888	0,0140
Aluminium	0,0411	0,0234
Drinks cartons	0,4779	0,6170

Valorised	1,7379	2,0517
Non-valorised	2,1724	2,5646
Hazardous household waste	0,9321	0,7306
Obstructive packaging	2,8965	2,7514

You can find more information here: https://www.fostplus.be/en/members/green-dot-rates

How do you apply the Green Dot rates?General rules:

All packaging elements must be declared based on their material category. Examples:

- Jam packaged in a glass jar with a label and a lid. The jar must be declared at the 'glass 001' rate, the label at 'paper-card- board 002' and the lid at 'steel 003'.
- Smartphone packaged in a cardboard box. The cardboard box should be declared as 'paper -cardboard 002'. The charger and the earphones are each in a separate PE-bag with a paper label. These bags should be declared in the 'PE films 011- 07' category, the two labels in the 'paper-cardboard 002' category.

Distinction between **hard** and **soft** packaging.

a. **Hard or rigid packaging** will automatically return to its original shape after buckling. This includes bottles, flasks,

containers, pots, trays and other blow-moulded or injection moulded plastic packaging. Hard packaging is usually comprised of dimensionally stable packaging which may or may not be combined with various packaging elements which ca n be separated from the actual packaging (e.g. label, cap, lid, sealing foil).

b. **Soft or flexible packaging** is not rigid and buckles easily. It includes sacks, bags, envelopes, stand-up pouches, removable sealing films, wrappers and similar flexible packaging articles. Soft or flexible packaging consists of one or more layers made of a variety of materials, including plastic film, paper, aluminium or a combination of these. The construction may be unprin ted, printed, coated and/or laminated.

Distinction is made between **transparent** versus **opaque** PET-packaging.

a. With transparent PET packaging, its content is clearly visible through the material.

b. With non-transparent or opaque PET-packaging, its content is not or barely visible through the material

Distinction between **colourless** versus **coloured** transparent PET-bottles and flasks.

a. Most transparent PET-bottles and flasks are colourless which means that they have not been coloured, eg by adding a colouring pigment

b. The coloured transparent PET-bottles and flasks were coloured by the producer, eg by adding a colouring pigment. The transparent coloured PET-bottles are split in blue or other colours. The colour of the PET-bottle is best seen at the injection point (at the bottom of the bottle) or in the neck (on which the closures fit)

Some household packaging must be sorted as hazardous waste after use. The determining factor as to whether the packaging hasto go through the household hazardous waste flow [KGA flow (Flanders) / DSM flow (Wallonia) / DCM flow (Brussels)] and therefore has to be declared as a packaging of a hazardous product is:

- the **type of product** contained in the packaging or the **type of packaging**, such as;

  - paints, varnishes and lacquers
  - glues and silicones
  - lubricants, fuels, motor oils and mineral oils
  - pesticides (herbicides, insecticides, fungicides, etc.)
  - single-use gas cylinders

No exception is made for this type of products on a natural or organic basis.

- **presence of**

  - either one of the **hazard symbols** GHS06 or GHS08
  - or a **child-resistant closure**

The **"obstructive packaging"** rate applies to the following household packaging that obstruct the selective collection, sorting and / or recycling:

a. Plastic cans with metal bottom or top

b. Plastic bottles that are at least 70% covered by a sleeve(or 50% for bottles <50cl), if it consists of a material different from the bottle and is not perforated

c. Laminated plastic packaging with aluminium film for beverages, fruit and vegetables, prepared dishes, pet food, maintenance products and body care

d. Oxo degradable packaging

e. Laminated cardboard packaging of chips and milk powders, insofar as they contain less than 85% paper fibre. Nevertheless, these packaging must be declared according to the correct material categories.

Companies that can demonstrate what efforts they will make to make this packaging better sortable and / or recyclable are exempted from paying this obstructive packaging rate for 2 years and fall back on the rate of the respective

2. Belgium: Valipac (responsible only for industrial and commercial packaging)

2023 Compliance tariffs per material in EUR / kg:

The financing contribution is calculated on the basis of the tonnage of industrial packaging declared (see calculation grid on the back).

Funding contributions:

Tariffs (excluding VAT) per tonne of industrial packaging declared	2023
Recyclable packaging (excluding plastic)	17,00 €
Recyclable plastic packaging	53,00 €
Non-recyclable packaging (including non-recyclable plastic)	106,00 €
Reusable packaging	0,00 €

Minimum funding contribution

The minimum funding contribution is: €50.

Retroactive membership

The Valipac system is open to companies that wish to put themselves in order with regard to their take-back and information obligations. The authorities require Valipac to apply retroactive membership for the five calendar years preceding the year of membership, with the exception of years for which:

1. no packaging has been placed on the Belgian market;
2. the packaging manager establishes conclusively that he has fulfilled his obligation to take back, alone or by contracting with a third party;
3. the packaging manager has been subject to a criminal sanction provided for in Article 32 of the Cooperation Agreement.

If the company cannot invoke any of these exceptions, the financing contribution amounts to €100/€250*.

This formula protects the company from individual fines (criminal and administrative) provided for by the Cooperation Agreement for not having fulfilled its obligation to take back individually. Administrative fines are €500 and € 1000 per tonne of non-recovered or non-recycled industrial packaging .

Value added tax

Financing contributions are subject to a VAT rate of 21%.

All payments must be made by means of a transfer to one of Valipac's bank accounts: ING BE77 3101 2794 8342 / KBC BE36 4324 0185 5181 / BNP Paribas Fortis BE28 2100

3449 0020.

* €250 for companies that are responsible for packaging for more than 50 tonnes of single-use packaging during the membership year and €100 for companies that are responsible for packaging for up to 50 tonnes of single-use packaging during the membership year.

Calculation grid for funding contributions

	Retroactive membership
Year 2022	Tonnage of the declaration x tariff 2022
Year 2021	Flat-rate contribution of €100/€250*
Year 2020	Flat-rate contribution of €100/€250*
Year 2019	Flat-rate contribution of €100/€250*
Year 2018	Flat-rate contribution of €100/€250*
Year 2017	Flat-rate contribution of €100/€250*

* For a Valipac membership in 2022 the annual flat-rate contribution for the years 2017 to 2021 amounts to :

- € 250 for companies that are responsible for packaging for more than 50 tonnes of single-use packaging during the membership year.
- € 100 for companies that are responsible for packaging for up to 50 tonnes of single-use packaging during the membership year.

When joining in 2022, the 2022 financing deposit is calculated on the basis of the tonnage of industrial packaging for which the company was responsible for packaging in 2021. At the beginning of 2023, the company informs the tonnage of industrial packaging for which it was responsible for packaging in 2022. This results in a statement between the 2022 funding deposit and the 2022 contribution and the invoicing of a financing deposit for 2023.

If the result of the operation (tonnage x tariff) is less than €50, a minimum financing contribution of

50 € is due.

Important note

In case of retroactive membership to Valipac, the premiums for the packaging waste (if any awarded) will not be paid for years for which a flat-rate contribution is of application

My Recycled Content

A bonus for the use of industrial packaging made from recycled material, placed on the Belgian market.

Since 1 January 2022, Valipac customers can benefit from **a bonus of €50/tonne of recycled material present in the industrial plastic packaging they use to market their products on the Belgian market**. The bonus applies to industrial plastic packaging that contains at least 30% recycled material from suppliers listed on the myrecycledcontent.be platform.

The bonus applies to industrial plastic packaging placed on the Belgian market for an entire calendar year. It will be paid in 2024 in the form of a reduction on the invoice amount of the declaration for thereference year 2023. Therefore, in the 2023 declaration, industrial plastic packaging containing recycled material and placed on the Belgian market, will be declared separately.

Example: The company purchased shrink film containing 50% recycled material. The total weight of the film is 20 tons. 60% of this packaging is destined for the Belgian market, 40% for export. The bonus amounts to: 20 tons x 60% = 12 tons, of which 50% recycled material = 6 tons x 50 € = 300 €.

If the packaging contains 30% recycled material, but the company uses less than 200 kg of recycled material on an annual basis, it will receive a flat-rate bonus of €10. From an annual use of 201 kg of recycled material, the bonus will be calculated according to the example described above.

Valipac uses two links to My Recycled Content:

For the companies responsible for packaging : www.myrecycledcontent.be (specific for the Belgian customers)

For packaging producers: www.myrecycledcontent.eu (EU wide interaction required)

3. Bosnia and Herzegovina – Ekopak

Packaging fees are based on weight and material type of the packaging

Packaging material	**Packaging fees* (BAM/ton)**	**Packaging fees* (EUR/ton)**
Glass	25	12,78
Metal	18	9,20
Paper	25	12,78
Plastic	35	17,89
Wood	16	8,18
Multilayer, and/or other materials	30	15,33
Packaging containing and /or contaminated by hazardous materials	550	281,21

* VAT 17% is not included

1 EUR = 1,95583 BAM

4. Bulgaria: ECOPACK 2023

In 2023 ECOPACK Bulgaria is once again able to **guarantee the effective fulfillment of the recovery and recycling obligations** for packaging waste in accordance with the Bulgarian Waste Management Act. As of 01.01.2023 till 30.06.2023 inclusive the base license fees and the current policy for discounts for timely reporting and payment will be preserved unchanged, as follows:

Material	Base Fee	After 10% discount for timely report submission (15th day of the month)	After additional 20% discount for timely payment (25th day of the month)
Plastics	0.175	0.1575	**0.126**
Paper and Cardboard	0.160	0.144	**0.115**
Glass	0.185	0.1665	**0.133**
Steel	0.079	0.071	**0.057**
Aluminum	0.089	0.080	**0.064**
Composites	0.194	0.175	**0.140**
Wood	0.098	0.088	**0.071**
Others	0.259	0.233	**0.186**
Fees are in BGN, per kilogram, excluding VAT *Indicated fee discounts apply only for reported quantities in excess of 10 tons per annum.* *Minimum annual fee for 1 obliged company BGN 150, excluding VAT*			

ECOPACK Bulgaria AD has been the largest Bulgarian Packaging Recovery Organization for 18 years running. **WE RECOVER WITH GREATEST CARE FOR SOCIETY AND NATURE.**

Over these **18 years** ECOPACK has:

Constantly strived to be of maximum use to its clients by enhancing its current **services** and developing new ones in the following fields:

- ✓ ***collection and transportation of packaging waste*** from manufacturing and warehouse sites;
- ✓ ***consultations, seminars and trainings*** aiming to provide specialist knowledge and help meet legal requirements;
- ✓ assistance with ***Corporate Social Responsibility*** programs.

- Actively engaged in the organization of **"green" initiatives for its clients.**
- Been the **main supplier for the recycling industry** – currently accounting for over 50% of the market share – an achievement made in close cooperation with 27 recycling subcontractors.
- Invested over **13 m EUR** in separate waste collection – **16 sorting lines**, over **17 000 code colored bins** – servicing 2.55 m people in 81 municipalities.
- Maintained financial stability – **5 m EUR** equity and **1.6x** current liquidity ratio.
- **Organized awareness raising and educational campaigns:**
  - ✓ 15 nationwide and over 100 local ones;
  - ✓ Leading partner for the "Let's Clean Bulgaria" campaign in the period 2012 - 2019;
  - ✓ 150 000 students in more than 950 schools and kindergartens have been trained in our state-of-the-art 3D Ecobus.
- Received numerous prestigious awards in the field of environmental protection:
  - ✓ In 2019 – **first place** in the "Recycling Industry and Waste Management" and **second** place in the "Education" categories, part of the "Greenest Companies in Bulgaria" contest organized by b2b Magazine
  - ✓ In 2016 – ***two out of three awards*** in the "Green communications and urban environment" category of the PR Priz contest
  - ✓ In 2014 and 2016 – ***The Green Academy Award*** in the "Recycling Industry and Waste Management" category, part of the "Greenest Companies in Bulgaria" contest organized by b2b Magazine
  - ✓ In 2014 – ***The Investor in the Environment Award*** in a contest organized by the Bulgarian Business Leaders' Forum
  - ✓ In 2013 – ***The Corporate Social Responsibility Award*** in a contest, organized by "Economy" magazine
  - ✓ In 2013 – ***Runner-up in the international competition organized by ISWA*** (The International Solid Waste Association). Category – Best Awareness-Raising and Educational Campaign (against 48 candidates from 27 countries on 4 continents).
- Applied ***European Practices*** in its operations, as the only Bulgarian ***member of ProEurope*** (granting the "Green Dot" copyright) and ***founder of EXPRA*** (Extended Producer Responsibility Association).
- Successfully implemented an integrated system in Quality Management ***EN ISO 9001:2015*** and Environmental Management ***EN ISO 14001:2015*** and also successfully passed Responsible sourcing audit***.***
- **1 100 companies** have placed their trust in our professionalism.

For the calculation of the contribution for the 2022 Obligation Year, the Targeted Persons must declare the materials that were marketed in Québec for the twelve (12) months comprised between January 1st and December 31st of the Reference Year, which is 2021.

Post-consumer recycled content credit
A credit of 20% for the payable contribution is granted to Targeted Persons that generate materials of which the percentage (%) of recycled post- consumer content reaches or exceeds the established benchmark, when the Materials report is submitted within the prescribed delays. The credit is granted by way of a distinct invoice that is issued in the year following the deadline to submit the Materials report. The appropriate documentation and samples to determine the content of post-consumer recycled material must be provided to Éco Entreprises Québec before the first deadline date to pay the contribution. The content of the recycled material is an element which is taken into consideration when calculating the payable contribution pursuant to section 53.31.14, paragraph 2 of the Environment Quality Act.

Ecodesign incentive bonus (pilote project)
A bonus of up to 50% of the contribution payable for the containers or packaging of a product concerned by an ecodesign measure may be granted to any eligible Targeted Person who has carried out an ecodesign measure for containers or packaging and who demonstrates that their measures meet the requirements set out on the ÉEQ website, when the total contribution to the Schedule has been paid in full, within the prescribed delay. The Targeted Person must provide the supporting documents to the certified body within the required delay.

The Targeted Person may obtain a credit of up to $25,000 per bonus application and may accumulate several credits up to a maximum amount of $60,000 per Targeted Person. A minimum amount of $5,000 per Targeted Person will be awarded to any Targeted Person whose bonus applications are deemed eligible by the certified body. This minimum amount will be capped at the total amount of the contribution payable in the Reference Year, if it is less than $5,000. The ecodesign bonus is granted only for the reported quantities of containers and packaging marketed during the Reference Year.

Options to facilitate compliance with small companies and low volume producers

The following table presents the flat fees for the 2022 Schedule of Contributions:

Options for low-volume producers	2021 Schedule Reference Year: 2020	Rates ($CAD)
Based on tonnage	Quantity generated ≤ 1 t	0
	Quantity generated > 1 t and ≤ to 2,5 t	830
	Quantity generated > 2,5 t and ≤ to 5 t	1,660
	Quantity generated > 5 t and ≤ to 10 t	3,320
	Quantity generated > 10 t and ≤ to 15 t	4,985
Based on sales	<=1M	0
	Sales > $1M and ≤ to $2M	4,985
Based on the number of points of retail service	= 1 point of retail service < 929 m^2	0

Targeted Persons

To be considered as a targeted person, a company should meet the following three criteria:

- It generates containers, packaging and/or printed matter ultimately intended for Quebec consumers;
- It has a place of business or an establishment in Quebec;
- It is the owner of a brand, a name or a distinguishing guise.

However, if the owner has no domicile or establishment in Québec, the first supplier of the products in Québec is required to pay the contribution for the containers and packaging or the printed matter, whether or not that supplier is the importer.

Éco Entreprises Québec may accept that a third party whose domicile or establishment is outside Québec and who is the owner of a brand, a name or a distinguishing guise becomes a voluntary contributor. A third party may be recognized as a voluntary contributor after having concluded an agreement with Éco Entreprises Québec to this effect.

8. Finland: FINISH PACKAGING RECYCLING RINKI LTD.

RINKI CUSTOMER FEES 2023

Fee	Fee 2022	Fee 2023
Customer fee €/ tonne	1,6 €/t	1,6 €/t
Customer fee minimum	265 €/contract/year	265 €/ contract/year
Customer fee maximum	4 500 €/ contract/year	4 500 €/ contract/year
Registration fee	0 €	0 €

If a company incurs a material group-specific recycling fee of more than EUR 10,000, Rinki will invoice this in two equal installments, with the second installment being due 120days after the first, but not later than 31 October.

According to the terms of contract, companies must report to RINKI Ltd annually the packaging materials and quantities that they have used to pack their products and placed on the market or imported together with its products. The 2022 packaging data must be submitted by **28 February 2023.**

Reporting the packaging data is essential for the producer responsibility system to work as it directly affects the system's financing, invoicing and operations.

If a company submits the 2022 data after 28 February 2023, RINKI Ltd collects a feefor the late declaration of packaging data

If packaging data is submitted in March, the late payment fee is 15% of the customerfee. If packaging data is submitted in April, the late payment fee is 30% of the customerfee. If packaging data is submitted 1.5. or after, the late payment fee is 50% of thecustomer fee. If the company has not submitted the 2022 packaging data by the end of May 2023, RINKI Ltd will invoice the late declaration fee as well as estimate-based customer andrecycling fees, which will be based on the packaging data available to RINKI Ltd.

Recycling fees for 2023, Finland
Note: There are two PROs in Finland. As of May 2023, both have had prices for all materials.

Material group	Material	Fee for B2B SPT (Finnish Packaging Producers)	Fee for consumer packaging SPT (Finnish Packaging Producers)	Fee for B2B SUM (Finnish Plastic Recycling)	Fee for consumer packaging SUM (Finnish Plastic Recycling)

COMPOSITE PACKAGING	70.50
- Composite packaging with paper/cardboard as the main material	70.50
- Composite packaging with plastic as the main material	70.50
- Composite packaging with glass as the main material	70.50

Financial contribution calculation rules

1. All the material constituting the manager's consumption packaging is charged based on the weight depending on the price of their material according to the monetary contribution tables hereof (contribution by weight). The consumption packaging articles are charged as a total with one more fixed contribution according to the monetary contributions tables (Annex B1) hereof (fixed contribution).

2. All the material constituting the other packages is charged by weight based on the price of their material according to the monetary contributions' tables hereof (fixed contribution). Every component per unit of other packaging is charged with one more fixed contribution according to the monetary contribution table hereof (fixed contribution).

3. The glues, the adhesive tapes, the tax tapes, the metal connections that are part of a packaging (e.g. a carton) and the user booklets or manuals are not considered packaging components.
4. The total contribution of a packaging is the aggregate of the contributions by weight of the material that constitute all packaging (consumption & other packaging) plus the proportionate fixed contributions by applying the previous rules.

11. Hungary: ÖKO-Pannon

Fees 2023

According to the legislations in Hungary all companies are obliged to pay an environmental tax(official name: environmental product charge) to the National Tax and Customs Administration(abbreviated Hungarian name: NTCA). The object of the charge is the packaging material instead of the packaging and thereforepackers are directly not subject of the law for domestic products. In case of products produced abroad the importer company is responsible for the charge, i.e. the company who imports, and sells the product in Hungary at the first time (with the first HU-VAT Nr.invoice), or uses it for their own purposes.

The product charge tariffs for packaging materials are the following in 2023:

Packaging materials

Material flow	Product charge tariff (HUF/kg)
Plastic (excluding plastic carrier bags)	57
Plastic carrier bags (excluding plastic carrier bags made of biodegradable plastic)	1 900
Plastic carrying bag made of biodegradable plastic	500
Composite (excluding composite laminated beverage containers)	57
Composite laminated beverage containers	19
Metal (excluding metal cans for beverages)	19
Metal cans for beverages	57
Wood, material of natural origin	19
Glass	19
Other	57

Green Dot trademark - Isolated use of the Green Dot trademark

Our company provides the legal usage of Green Dot trademark for producers, importers and retailers as well.

1. **Contract based on packaging emission report once a year** - In this case the Licensee shall send the Licensor a packaging emission report once a year and **pay 1.5 EUR/ton by the amount of the packaging emission.**
2. **Contract according to categories** presented in the following chart:

Annual amount of the packaging emission (ton)	Annual fee	Packaging category
above 10,000 ton	EUR 9 000	A
between 5,000 ton – 10,000 ton	EUR 6 000	B
between 3,000 ton – 4,999 ton	EUR 3 000	C

Services of ÖKO-Panno - Consultancy service

Due to a legislation of environmental product charge put into force in January 2012, ÖKO-Pannon Plc. has launched consultancy service on compliance with actual environmental product charge and waste law for packaging emitters.

- Notification obligation
- Environmental product charge declaration
- Environmental product charge refund process
- Providing the use of Green Dot trademark

Optimization consultancy with relation to products liable to product charge (batteries; packaging products; other petroleum products; electric appliances and electronic equipment; tires; commercial printing paper; other plastic products; other chemical products; paper stationery) including:

  - interpretation and use of laws in force regulating product charge with consideration to the company's range of products
  - classification of packaging materials
  - creating the system of taking over the liabilities
  - forming the textual content of invoices (incoming, outgoing)
  - classification of product packaging into the proper product charge category
  - updating background administration in accordance with new laws
  - preparing reports to NAV (National Tax and Customs Administration)
  - review of NAV reports both in terms of running year and previous years
  - continuous availability
  - on-site consultancy
  - petition of stance from NAV
- Consultancy on individual exemption and coordination
- Preparing for compliance with the actual law on waste management
- Preparing for compliance with the packaging regulation
- Supervision related to the fulfillment of recovery and recycling obligation and product charge reports
- Consultancy in the field of fulfillment of international recovery and recycling obligation (sending in contracts and reports)
- Consultancy in the field of single use plastic (SUP)
- Packaging or not packaging – providing professional opinion according to the laws in force:
  - interpretation and use of laws in force regulating product charge with consideration

to the company's range of products
    - classification of packaging materials

Other Plastic/Material	990	135
Metal	229	115
Wood	41	41

Environmental Contribution for Packaging – 2023

The CONAI Environmental Contribution, established for each type of packaging material, represents the form of financing through which CONAI distributes the cost for higher charges for separate waste collection, recycling and recovery of packaging waste among manufacturers and users. These costs, based on the provisions set forth in Legislative Decree 152/06, are distributed "in proportion to the total quantity, weight and the type of packaging material issued on the national market."

Environmental Contribution amount per material:

Consortium regulations state that the sums owed by all Consortium Members, Producers and Users are always collected based on the specific invoiced amount due according to the weight and type of packaging material covered by the first supply.

The first supply shall mean the transfer, including temporarily or under any capacity, within Italy of:

- the finished packaging from the "final producer" to the "first user";
- the packaging material from a "raw material (or semi-finished product) producer" to a serving or proclaimed "self-producer".

Moreover, the same regulations state that any packaging materials and **packaging imported from abroad** shall be **subject to the Environmental Contribution** given that their use will produce waste in Italy.

Environmental Contribution		**From 1st January to 30 June 2023**	**From 1st July 2023**

b) Fees are applicable from 1st January 2023.
c) Above fees are exclusive of VAT.
d) Minimum charge is €200 (excl. ERA registration + VAT).

Payment Terms

Yearly Participation Fee excl VAT	Payment terms
€ 100 to € 2,500	On invoice
€ 2,501 to € 12,000	50% on invoice, 50% by 1st July

€ 12,001 to € 46,000	4 pro-rata quarterly payments due 1st week of each quarter.
€ 46,001 and over	12 pro-rata monthly payments due 1st week of each month.

16. The Netherlands: Afvalfonds Verpakkingen

The Packaging Waste Management Fee has various rates, depending on the type of material. The rate per category of material is determined by the costs involved in collecting, separating and recycling that specific material. Part of the rate comprises the general system costs, these being the costs incurred for monitoring recycling and prevention of litter, amongst other things. These costs are evenly distributed over the categories of material.

The following companies are responsible for registering and contributing to the system: Regular producer/importers of packed products- This is the first Dutch company who:

1°. places substances, preparations or other products on the market in a packaging; and/or

2°. commercially imports substances, preparations or other products in a packaging anddisposes of the packaging; and/or

3°. commercially instructs another to provide the packaging of substances, preparations or otherproducts with its name, logo or brand; and/or

4°. places a packaging on the market which is intended to be added to substances, added to substances, preparations or other products to be provided to the user

Foreign distance sellers (e.g. online sales)

Foreign companies that fulfil the functions as described above, but do so by selling directly to a private consumer (i.e. not to a company). In cases where foreign companiessell packed products to Dutch companies, the Dutch company is seen as the obliged company.

Explanation of tables:

***Plastic lower rate**

Is your plastic packaging easy to sort and readily recyclable? If so, you might be eligible for this scheme and pay a reduced rate. Click here to read more.

****Biodegradable plastic (bioplastic)**

Bioplastic should be disposed of with residual waste. According to the latest results, bioplastic can interfere with the recycling of the total plastic flow. Also, it cannot be processed in current composting facilities. The aforementioned low rate, therefore, was discontinued in 2019.

General rate

What if you are unable to determine the breakdown of your packaging according to category of material? The general rate applies in this case.

Other categories of material

This includes all packaging not made of glass, paper/cardboard, plastic, wood or metal, for example jute bags (textile) and stone jars/earthenware (ceramic).

Drinks cartons

A drink carton comprises at least 70% paper and/or cardboard. Crucial to this definition is whether the contents are intended for human consumption. Consequently, contrary to what the definition suggests, it does not have to be about drinks. It could also be liquid products which are intended for cooking (soups, sauces, etc.) For monitoring purposes, it is important that we know the composition of drinks cartons. Therefore, in your declaration you enter how many kilograms per category of material from which the drinks cartons are made.

Indirect export

In the case of indirect export, a different rate applies to plastic. The other rates remain the same.

Plastic bottle for soft drink or water without deposit

You are required by law to register for the deposit scheme as quickly as possible. So, register now. Do you release plastic soft drinks and/or water bottles on the Dutch market which are not yet covered by the deposit scheme? Then you are obliged, even if you release less than 50,000 kilos per calendar year on the Dutch market, to file a declaration and pay the Packaging Waste Management Fee. You pay the regular plastic rate.

** Consumer, grouped and transport packaging collectively*
*** mainly includes HDPE, LDPE, PP, PS, XPS, EPS, PVC, Other plastic*

What cost in respect of sorted waste collection does a producer pay by means of ENVI – PAK PRO?

Cost in respect of sorted municipal waste collection Cost in respect of handling, additional waste sorting and waste treatment Cost in respect of recycling and energy recovery Investments and overheads of collection companies	Fuel, utilities, vehicle depreciation, rental, lease, repair and maintenance cost, expendable supplies, payroll, insurance, taxes, handling equipment and real estate depreciation, cost in respect of disposal of useless mixtures from sorted waste, transport to the facility, energy recovery fee, recycling fee, transport services, repair and maintenance cost.
Other costs of collection companies	Promotion, awareness raising, staff training, public procurement, market research, PPE, other operating, administrative and business costs.
Revenues from sales of secondary raw materials	Collection company considers the highest monthly market revenue in respect of sales of the respective commodity.
Cost in respect of sorted waste collection concerning other than municipal waste	Sorted waste collection from group and transport packaging in the extent of cost in respect of collection, treatment and recovery after consideration of revenues from sales of the respective raw material.

Promotion and education activities concerning waste sorting aimed at the general public	Nationwide and regional education for the general public; education for pupils at schools; education materials
System management and Coordination Center operation costs	Administration and financing of the operation of a collective management system

NOTICE OF RATES - NON-PACKAGING PRODUCTS

Price list valid from April 1st, 2023

Non-packaging product	Rates for the single non-packaging products (EUR/kg)
Glass	0.085945 €
Plastics	0.409960 €
Paper and cardboard (including newspapers and magazines)	0.089979 €

What cost in respect of sorted waste collection does a producer pay by means of ENVI – PAK PRO?

Cost in respect of sorted municipal waste collection Cost in respect of handling, additional waste sorting and waste treatment Cost in respect of recycling and energy recovery Investments and overheads of collection companies	Fuel, utilities, vehicle depreciation, rental, lease, repair and maintenance cost, expendable supplies, payroll, insurance, taxes, handling equipment and real estate depreciation, cost in respect of disposal of useless mixtures from sorted waste, transport to the facility, energy recovery fee, recycling fee, transport services, repair and maintenance cost.
Other costs of collection companies	Promotion, awareness raising, staff training, public procurement, market research, PPE, other operating, administrative and business costs.
Revenues from sales of secondary raw materials	Collection company considers the highest monthly market revenue in respect of sales of the respective commodity.
Promotion and education activities concerning waste sorting aimed at the general public	Nationwide and regional education for the general public; education for pupils at schools; education materials
System management and Coordination Center operation costs	Administration and financing of the operation of a collective management system

Recycling and Recovery Fees 2023

The industrial-commercial waste stream is driven by the free market and the demand-supply mechanism. The national legislation transposing the European Directive for Packaging and Packaging Waste (Law no.249/2015 with subsequent amendments and revisions) stipulates that the recovery and recycling objectives apply to the entire quantity of packaging placed on the market by the obliged industry, regardless of the stream in which it eventually becomes waste (i.e. municipal/household or the industrial-commercial sector), for which distinct targets are yet to be set. According to legal requirements currently in force (i.e. Ministry of Environment Order no.1362/2018), the EPR schemes (PROs) have to calculate and publicly disclose distinct fees applicable to municipal/household packaging (mainly primary and secondary) and industrial-commercial packaging (primary, secondary and tertiary). The quantities managed by PROs are exclusively based on the obliged industry's declarations of packaging placed on the national market during the previous month. Based on the above mentioned regulations, PROs are also obliged to disclose on their websites the quantities of municipal/household packaging contracted with their entire client portfolio every quarter (aggregated, per type of material), based on which local municipalities or intercommunity associations of municipalities calculate the market share and subsequently allocate recycled/recovered packaging waste to each PRO that undertakes the responsibility to cover the net cost within that particular geographic area. For the packaging waste generated in the municipal/household waste stream, PROs are obliged to cover regulated net costs incurred by delegated operators (municipal or private authorized waste management companies) related to separate collection, transfer, sorting and recovery (if recycling is not possible). Therefore, there is basically no competition between PROs at the municipal/household level. The industrial-commercial waste stream is driven by the free market and the demand-supply mechanism.

1. Packaging that contains goods, that are intended for the consumers, no matter if the goods are really consumed by the consumers or are used at business activities.
2. Packaging that is used only at the business activities.
3. Service packaging - products that are designed and intended for the filling of the goods at the point of sale and products for single use, that are sold or filled with goods or are designed and intended to be filled at the point of sale, if they are used as packaging.
4. Composite packaging - packaging made from two or more layers of different materials, that cannot be separated manually and constitute one inseparate unit.
5. Packaging made from more than one material - packaging where its parts are made from at least two different packaging materials or additional elements that are part of the packaging and are made from different materials as the packaging itself. The layers can be manually separated.

4.&5. Include only materials that represent more than 5% of the whole mass of the packaging. The mass of the material that is less than 5% is calculated to the predominant material.

6. Packaging contaminated with hazardous waste that is marked as hazardous with security sheet for removal.

All fees are in EUR/tonne, VAT not included.

- When the packaging fee is less than **30,00 EUR** (without VAT) per quarter, an invoice with the flat rate of **30,00 EUR** (without VAT) per quarter is issued.
- In case of any environmental legislation changes, the Company has the right to make adjustments to the packaging fees.
- In case the Customer does not submit the quarterly report, **20,00 EUR** are added to each invoice.

20. Spain: ECOEMBALAJES ESPAÑA, S.A. (ECOEMBES)

Green Dot fees - Ecoembes 2023

Packaging materials: The price of the Green Dot is equal to the expense of **managing the packaging waste**. Because managing an aluminium package at the same weight is more expensive than managing a cardboard, plastic, or steel package.
These are the current rates, which have been modified to accommodate a population whose recycling habits are rising daily and which have been estimated to cover the additional cost of selective collection of packaging waste.

Material		2023
Steel	Beverage cans made of steel	0.146 €/kg
	Other steel packaging	0.133 €/kg
Aluminium	Beverage cans made of aluminium	0.048 €/kg
	Other aluminium packaging	0.034 €/kg
PET	Packaging/3L PET beverage bottles (excluding dairy and vegetable drinks)	0.423 €/kg
	PET rigid	0.396 €/kg
HDPE (rigid packaging and UNE bags)		0.272 €/kg
Other rigid plastics (*)		0.752 €/kg
Film and flexible plastics (**)		0.904 €/kg
Flexible compostable plastic		0.544 €/kg
Carton boxes for food and drink (carton type packaging)		0.502 €/kg
Paper and cardboard		0.088 €/kg
Ceramic		0.015 €/kg
Wood and cork		0.007 €/kg
Additional materials (***)		0.904 €/kg

**Other rigid plastics: include rigid PP, rigid PS, rigid PVC, rigid compostable, and other rigid plastics.*

***Film and flexible plastics: include flexible PET, flexible LDPE, flexible HDPE, flexible PP, flexible EPS and other flexible plastics.*

****Additional materials: Materials not falling under any of the other categories are covered in this section.*

Fees of Simplified Statement: The rates used in this modality are established based on the tons **of packaging sold in the previous year's market.**

Green Dot fees	1st Batch	2nd Batch	3rd Batch	4th Batch	5th Batch	6th Batch
Tonnes of material / previous year	From 0 to 1 Ton	From 1 to 3 Tons	From 3 to 6 Tons	From 6 to 8 Tons	From 8 to 10 Tons	From 10 to 12 Tons
Euros / year 2020	263 €	650 €	1.294 €	1.944 €	2.750 €	3.500 €
Euros / year 2021	301 €	743 €	1.479 €	2.222 €	3.143 €	4.001 €

21. Spain: ECOVIDRIO (Glass packaging)

Regarding glass packaging, green dot fee is made up of 2 addends:

- One for packaging units placed on the market and
- another one for the weight of those glass packages.

Green Dot fee 2023 = C1 x units of glass packaging + C2 x kg of glass packaging

C1= 0,00432 €/unit C2 = 0,03045€/kg

	435	Plastic (low)	4,42	4,42
	531	Aluminium	6,40	4,80

Differentiated fees are driving progress

Differentiated fees mean that you pay a lower fee for packaging that is designed for recycling, compared with packaging that is difficult to recycle. The aim of differentiated packaging fees is to reflect the actual cost of recycling. In that way, the fees provide an incentive for producers to design packaging that is easier to recycle. We can help you design packaging that is more sustainable and easier to recycle.

Fee levels for plastic packaging

Level 1 fee (highest fee)

All plastic packaging that does not meet the criteria for Level 2 fee.

Level 2 fee (lowest fee)

Plastic packaging that is designed for high recyclability without loss of quality in the recycling process qualifies for a lower packaging fee if the following criteria are met:

- Packaging made from one of the following monomaterials, and the specified packaging type:

– PE (Polyethylene, such as LDPE, HDPE, LLDPE or MDPE) – stiff and flexible packaging

– PP (Polypropylene) – stiff packaging, rigid PP (PP film)

– PET – clear bottles and jars (blow-molded packaging, no deposit return)

All materials must be free from fillers (e.g. chalk, talc or plant fiber).

- No black dye
- The packaging must not be made of a multi-layered material.

(One exception – which has also been approved for the lowest fee – is co-extruded multi-layered material with multiple layers of the same type of plastic (PE-PE or PP-PP (stiff PP, rigid PP)), as well as co-extruded multi-layered material of PE or PP (stiff PP, rigid PP) with any of the following coatings:

– EVOH, max. 2 wt%

– SiOx

– AlOx

Please note that the layers of these multi-layered materials must not be bonded with glue/adhesives.)

- The packaging does not have a print that covers more than 60 percent of the outer packaging.

Print: both colored and unpigmented surface coating.

Outer packaging: the external part of the packaging that is visible without untucking flaps, etc.

- The packaging is not completely covered by a shrink sleeve.

The criteria are revised annually by FTI and its owner companies, based on the recycling potential of a specific material.

Fee levels for paper packaging

Level 1 fee (highest fee)

All paper packaging, including corrugated cardboard, that contains any type of:

- Plastic, wax or aluminum coating
- Wet-strength paper that is not water-soluble
- Composite material comprising a blend of paper fiber and plastic

Level 2 fee (lowest fee)

All paper packaging, including corrugated cardboard, that is 100% paper.

The criteria are revised annually by FTI and its owner companies, based on the recycling potential of a specific material.

22. Turkey: CEVKO

Fees 2023

According to the legislations in Turkey all companies are obliged to pay “recovery contribution fee” to the government, specifically to the Ministry of Finance. The fee is paid for packaging and other products that cause waste based on a list of items. In case of packaging, the fee is paid by the packers, fillers and importers and the list includes packaging made of glass, metals, plastics, paperboard, composites and wood.

ÇEVKO offers contracts for the use of “the Green Dot” trademark in Turkey.

The annual fixed fee for the use of the Green Dot logo for packaging circulated in Turkey in 2023 is 6.500 Turkish Lira (TL) + V.A.T.

Please note that the trademark usage contract only covers the cost for use of “the Green Dot” trademark on packaging put on the market in Turkey. When it is signed, it gives the approval to mark the sales packages with the trademark in Turkey.
